**THE REPORT**

OF

**THE COMMITTEE OF VISITORS**

OF THE

LUNATIC ASYLUM, FOR THE CITY AND COUNTY OF BRISTOL.

---

Your Committee have much pleasure in reporting that the state of the Asylum during the past year has been very satisfactory.

The number of Patients in the Asylum at the date of our last Report was 126 Males and 133 Females, making a total of 259.

The present number is 279, namely, 137 males and 142 females, shewing an increase of 20 Patients over the number mentioned in our last Report.

The greatest number resident at one time being 138 males and 144 females, making a total of 282, the average number being 133 males and 137 females.

Notwithstanding the additions made to the Asylum three years since, it is now inconveniently crowded, every bed being occupied, including temporary accommodation for 26 Patients.

It is the duty of your Committee to report that at no distant period they shall have to submit to the Council the important subject of meeting the requirements of the Commissioners in Lunacy.

On the 27th March last, J. E. Campbell and John D. Cleaton, Esquires, two of the Commissioners, visited the Asylum, and reported very favourably of the Establishment.

A copy of their Minute will accompany this Report.

In February last, Dr. Sidney Carter resigned his appointment as Assistant Medical Officer, to take charge of another Institution.

On the 8th of March following, Dr. William T. Benham was elected to the vacant office, who has performed his duties in a very satisfactory manner.

During the past year various recreations and amusements, including Dramatic Entertainments, have been provided for the Patients, which your Committee believe have tended to improve their mental condition and afforded them much gratification.

Mr. George Thompson, the Superintendent, has most efficiently performed his important duties, and he will submit a Statistical Report of the Patients.

The duties of Chaplain are regularly performed by the Rev. J. B. Spring, to whom the Patients are much attached.

The whole of the Establishment is in good order, and reflects credit on Mr. Fuller, as Clerk and Steward ; Miss Haile, House-keeper ; and all the officers and servants, who, in their respective departments, have willingly co-operated with your Committee in carrying out the important duties devolving on them.

**FREDERICK TERRELL,**  
CHAIRMAN.

Council House,  
30th December, 1872.

# R E P O R T

OF THE

## VISITING COMMISSIONERS IN LUNACY.

BRISTOL BOROUGH ASYLUM,

27th March, 1872.

At our official visit this day we have inspected the Asylum in all its departments, and seen every Patient except one of each sex, who are away on trial.

The numbers on the books are 134 of the male and 134 of the female sex, total, 268. The Patients were clean and fairly dressed in both divisions, but we think that during the winter months there should be a larger proportion of linsey dresses amongst the women. In No. 10 and 11 female wards two or three of the women became very noisy and excited, but otherwise the inmates in both divisions were very orderly and quiet. About 74 Patients, 36 men and 38 women, were dining together in the Hall, where they behaved very well. The meat pudding, with potatoes and beer, seemed to be enjoyed, and the food was abundant and neatly served. Very few Patients were in bed by reason of bodily infirmity, and the general health is good, but we find 17 men and 24 women reported as under Medical treatment. Sixteen men and 15 women have died since the last visit, a year ago. This is a somewhat high rate of mortality, but the deaths were all from ordinary causes, viz. :—

	M.	F.	Total.
General Paralysis	8	2	10
Other forms of main disease, including			
Apoplexy and Epilepsy	3	4	7
Pulmonary Consumption	0	3	3
Other Lung and Heart diseases	1	2	3
Senile Decay	4	4	8
Total	16	15	31

In the above cases, 22 post mortem examinations were made, and one inquest was held upon the body of a man who died suddenly after a struggle with an attendant. The verdict was that he died from "congestive cerebral apoplexy, caused by great mental and muscular excitement."

The circumstances were fully reported to our Board at the time.

Of the 62 Patients discharged during the past twelve months, 18 men and 36 women were reported to be recovered. The admissions within the same period have been 50 in the male and 54 in the female division. We are informed that no patients have actually been refused admission, but some of the dormitories are overcrowded, and beds have been placed in two of the corridors.

There is not one vacancy for men, and only four empty beds on the women's side. In these circumstances the consideration of how best to effect an enlargement of the Asylum can no longer be properly delayed, and at the same time it is very desirable that additional land should be purchased. There is an orchard to the west of the Asylum, which we understand is in the market. The price is stated to be high, but, considering the present want of ground and the future requirements caused by the gradual enlargement of the building, we very strongly recommend that the purchase should if possible be made.

No case of restraint is recorded since the last visit, but 11 men and 13 women have been secluded, the former on 17 and the latter on 43 occasions. The attendance in the Chapel is about the same as last year, viz., 130 on Sundays and 81 on week days, the numbers of each sex being nearly equally divided. Of the men 75 and of the women 62 were last week in regular and useful employment, 27 of the former being occupied on the farm and garden. There are weekly associated parties in the Hall, at which 130 Patients are generally present; and the usual in-door amusements appear to be liberally provided, but very few Patients are taken beyond the premises for exercise, on which ground we

to-day had some complaints. The difficulty felt in carrying out the necessary arrangements for this purpose seems to be the smallness of the Staff, and we again recommend the engaging of an additional Nurse for the refractory ward and another Attendant in the male division. Something, too, should be done to obtain the services of older and more experienced female attendants, which, in our opinion, will not be possible with the low rate of wages (£12 per annum) now given.

The Wards were quite clean and properly ventilated. Some of them have been coloured and painted, and improvements of a similar kind are still being carried out. We made some suggestions for the improvement of the Shower Baths, especially on the women's side, where attention to the drainage seems to be necessary. A thorough revision of the bedding is also required, as on some of the beds the blankets are very thin and deficient in number.

We have examined and signed the books and registers, and made all statutory enquiries. There is no record in the case book of the deaths of two Patients who died on the 3rd and 19th of February last, and in several other cases we must call attention to the fact that the entries have not been made in the manner prescribed by the Statute, and that the notice of death forwarded to the Coroner must consequently have been informal.

In March last, Dr. Stephens resigned the appointment of Medical Superintendent, and the Council granted him a retiring annuity for life. He has been succeeded by Mr. Thompson, formerly at the Wakefield Asylum, under whose management the Institution continues to be in excellent order. Very recently Dr. Benham has been appointed Assistant Medical Officer.

W. G. CAMPBELL,	}	Commissioners in Lunacy.
JOHN D. CLEATON,		

# TWELFTH ANNUAL REPORT

OF

## THE MEDICAL SUPERINTENDENT.

1872.

*To the Committee of Visitors of the Bristol Lunatic-Asylum.*

January 1st, 1873.

GENTLEMEN,

I have the honour to submit to you the Twelfth Annual Report of the Medical Superintendent, which, together with certain Statistical Tables, will afford an account of the work done in the Asylum during the year just closed.

The admissions, re-admissions, discharges, and deaths since the date of the last report have been as follows :—

	MALES.			FEMALES.		
	Private.	Pauper.	Total.	Private.	Pauper.	Total.
On the Books Dec. } 31st, 1871. }	„	126	126	1	132	133
Admitted in 1872 ...	„	44	44	„	35	35
Re-admitted in 1872	„	8	8	„	8	8
Discharged						
„ Recovered	„	19	19	„	25	25
„ Relieved	„	2	2	„	0	0
Removed .....	„	3	3	„	1	1
Died .....	„	17	17	„	9	9
Remaining Dec. } 31st, 1872. }	„	137	137	1	140	141
Highest Resident } Numbers }	„	138	133	1	143	144
Average Resident } Numbers }	„	133	133	1	136	137

On comparing the above Table with that contained in the **Comparison of**  
 Report of 1871 it will be seen that there has been a decrease of **Numbers**  
 9 in the total number admitted, an increase of 4 in the number of  
 patients under treatment, of 15 in the highest number resident,  
 of 12 in the average number resident, and of 19 in the number  
 remaining on the books at the end of the year.

Of those admitted and re-admitted, 22 males and 27 females **The Admissions**  
 presented a fair and reasonable prospect of recovery, leaving no  
 less than 30 males and 16 females whose cases were from the first  
 regarded as hopeless. In the latter class 11 males and 2 females  
 were the subject of general paralysis of the insane—a disease  
 which has hitherto been regarded as most certainly fatal in its  
 mode of termination; 14 epileptics—10 males and 4 females—  
 with 9 males and 1 female suffering from other forms of brain  
 mischief, make up an entire list of 30 males, and 7 females who  
 were at the time of their admission the subject of organic cerebral  
 disease. Other complications noted at the time of reception  
 were:—Phthisis Pulmonalis in 3 males and 3 females; Heart-  
 disease in 5 males and 1 female; and Pleurisy in 1 female. The  
 cases received from the various workhouses were, with hardly a  
 single exception, quite hopeless as to the possibility of cure or  
 even amendment.

Fifty patients were, for various reasons, discharged from the **The Discharges.**  
 asylum. Of these, 19 males and 25 females were recovered; 2  
 males, who were considerably relieved, were committed to the  
 care of their friends; the remainder, 3 males and 1 female, were  
 removed to other asylums. Amongst those deemed recovered  
 were 3 males, who at the time of their admission presented unmis-  
 takeable signs of the existence of general paralysis of the insane,  
 but who, under the use of the Calabar bean (*Physostigma*  
*venenosum*) made rapid improvement; and though months have  
 passed since their discharge, there has been no tendency to a  
 relapse. So far as I am aware these are the first cases recorded  
 of recovery from this fearful malady. The percentage of re-  
 coveries on the admissions has been at the rate of 46.6 per cent.

The death-rate this year is the lightest yet recorded. Seven- **The Deaths.**

teen males and 9 females only have died. These numbers, calculated upon the average numbers resident, give a percentage of 12.7 males, and 6.5 females, or a total percentage of 9.6. Reckoned upon the total patients that have passed under treatment, the rate will be seen to be as low as 7.2 per cent. of deaths. The causes of death were :—General Paralysis, 8 ; Epilepsy, 1 ; Disorganization of the Brain, 7 ; Pulmonary Consumption, 3 ; Chronic Bronchitis, 1 ; Heart-disease, 1 ; Senile decay, 3 ; Exhaustion after Melancholia, 1 ; Marasmus, 1. The average age at death was 44 years.

**Inquest.**

The death from Epilepsy gave rise to a coroner's inquest. It was the case of E. C. P., who was found to have turned upon his face during the night, whilst in a fit, which led to his being suffocated. The verdict returned by the jury was in accordance with the facts, and no blame was attached to anyone. The circumstances were fully reported to you at the time of the occurrence.

**Accidents.**

Two severe accidents have happened during the year. One was occasioned in this manner :—An old man, S. H., suffering from disorganization of the brain, and general systemic decay, was attempting to escape from the airing-court, when another patient gave him a "lift," and in falling helplessly on the other side of the gate, he sustained a simple fracture of the neck of the right thigh-bone. The other accident resulted in the fracture and separation of the outer condyle of the left elbow, and was occasioned by the falling of the patient upon his hand when seized with a severe epileptic fit. In neither instance was the accident followed by any serious result, and both patients are still in the asylum, and in their usual state of health, though many months have elapsed since the injuries were sustained.

As in previous years, many attempts at suicide have been made, but again I have to report, and this I do with much thankfulness, that no attempt of this kind has been successful.

**General Health.**

The general health of the patients has been very good. There is, however, a large number of aged and feeble inmates, whose certain demise will swell the death rate in another year.

The proportion of epileptic patients is also very large, as compared with other asylums ; and in consequence of the extreme care bestowed upon them when in the dangerous condition known as the “status epilepticus,” this class of patients is accumulating in considerable numbers, the clear gain this year being no less than 7 such cases. With a single exception there has been no case of “preventable” disease which had its origin within the asylum.

The usual means of amusing the patients have been afforded. Amusements. These means consist of a weekly dance, when as many patients attend as the dining-hall will accommodate ; frequent entertainments, musical and dramatic, and abundant out-door exercises—such as cricket. The practice of taking the more robust of the patients to a “pic-nic” at a distance has been abandoned as being exclusive, costly, and accompanied by much personal risk. A “garden-party” has been substituted, and much pleasure and satisfaction are afforded by the presence of strangers who attend on these occasions and mix freely with the patients.

Two Commissioners in Lunacy visited the asylum, and their minute, which may be considered as highly favourable, will precede this in the printed Report. All the suggestions made by these gentlemen, whether written or verbal, have received attention, and for the most part have been carried into effect. By your direction 60 linsey dresses have been added to the stock already in hand, which afford a proportion of 4 such garments to every 5 patients ; weather permitting, large parties of patients walk beyond the grounds on Saturday afternoons ; an additional nurse has been engaged, who acts as a supernumerary to relieve the other nurses in turn from duty, or to perform other special work when such service is necessary ; the shower bath in the female division has been re-constructed ; the bedding has been revised most thoroughly, and where necessary, the mattresses have been re-made ; and a verbal suggestion as to the economy of “grained” as compared with “painted” woodwork has been adopted in practice so far as work of that kind has been done. The remark made by the commissioners as to the youthfulness of the female

Visit of the  
Commissioners  
in Lunacy.

attendants led me to enquire into that subject. I found that the average age was 25, at which standard it still remains. The suggestions as to the urgent necessity of a permanent enlargement of the building so as to meet with the demands of the city I must leave for your especial consideration. Suffice it for me to say, that every bed in the house (including the temporary accommodation which has been made to the extent of 26 beds) is now filled, and if the numbers continue to increase, bedding will have to be placed in the corridors, and even the day-rooms—a proceeding which would not fail to affect most seriously the general health of the patients.

A Suggestion. } There is, I regret to say, no fund at my disposal for the pecuniary relief of patients recovered and about to be discharged, as is the case now in many English asylums. It often happens that when the head and mainstay of a family becomes the subject of insanity, he finds as reason returns to him that his house has been broken up, partially or entirely, and in many instances the thought of this, which will occur to a recovering patient, has an undoubted tendency to retard such recovery. If out of the superabundance of money which is annually bestowed in charity in the city of Bristol, a small sum, say £20, were devoted to the purpose I have named, many a recovery would be expedited, and many a home rendered desolate would once more be made bright.

Present Staff of Officers. } The only change which has occurred in the staff of officers was caused by the retirement of a very able and agreeable officer, Dr. Sidney Herbert Carter, on the occasion of his appointment to a position which he deemed more desirable than that he held here. The vacancy so caused was filled by the appointment of Dr. W. T. Benham, whose geniality and general ability render him a desirable acquisition to the asylum and its management. The other officers, from whom I continue to receive able assistance, remain in their respective positions. To the attendants and servants much of the good results recorded above are due, and in the discharge of their arduous and often thankless duties, they deserve all the sympathy it is possible to render to them.

To you, Gentlemen, I have once more to tender my thanks  
for the support I always receive at your hands, and

I am,

Yours very obediently,

**GEORGE THOMPSON,**

# CHAPLAIN'S REPORT.

---

GENTLEMEN,

The report which I have now the honour to lay before you will be found not to differ materially from the reports of former years.

The services have been continued as usual, and the Sacrament of the Lord's Supper administered at the stated periods. I have to note as heretofore the orderly behaviour of all the patients during the time of Divine worship, and the real interest which some amongst them manifest in the things that they hear ; it is particularly in my visits through the wards that I am reminded of this interest. I hear the sermon constantly discussed, and I find that the conduct of those who take part in the discussion is generally becoming and their "speech void of offence."

I am reluctantly compelled to direct your attention to the condition of the Library. The Books which, through your kindness in giving me a small grant, I was enabled to purchase some years since have been repeatedly gone through, and are, moreover, soiled and stained. I expect, through your Superintendent, a grant from one of the religious societies, and if in addition I were to receive another from you, I think I should be enabled to make the Library a real source of benefit to the patients.

It is scarcely necessary for me to allude to the entertainments which are given weekly within the Asylum, and I do so only for the purpose of expressing my approval of them. The Dramatic performances which lately took place afforded great enjoyment, and are yet spoken of with pleasure. They have made the patients look away from their own calamity and misfortunes, and whatever tends to this, whether it be a religious service or a musical fête or a dramatic representation, good must follow.

I have only in conclusion to say that I am indebted to Mr. Thompson and his able coadjutor, Dr. Benham, for every kindness and courtesy ; and with many thanks for your continued confidence,

I am, Gentlemen,

Your obedient Servant,

J. BURCHELL SPRING. *Chaplain.*
